

laMARCHE®

ISO 9001:2015 CERTIFIED

A36D Series

Battery Charger / Power Supply with LCD Display

Controlled Ferroresonant Rectifier / Power Supply

The La Marche Model A36D Controlled Ferroresonant Rectifier/Power Supply has many inherent advantages such as voltage regulation, high efficiency, high power factor and short circuit protection. These chargers provide adjustable voltage levels for floating or equalizing lead or nickel-cadmium cells, which can be done digitally through the LCD display. The equalize cycle is activated either manually through a switch on the front panel, or automatically scheduled. (adjustable through the menu).

Steady state output voltage remains within $\pm 0.5\%$ of the setting from no load to full load and for AC input voltages within $\pm 10\%$ of the nominal input voltage. The model A36D is internally filtered to be no greater than 32dBm ("C" message weighting) and 30 millivolts RMS for all conditions on input voltage and output load with or without batteries connected. This allows the A36D to be used as a battery eliminator.

Unit Shown with LCD Display

Made in U.S.A

Standard Features

LCD Display

One Pole DC Output Breaker / Single Phase Units

Output Fusing / Three Phase Units

Automatic DC Voltage Regulation

Automatic AC Voltage Compensation

Float/Equalize Mode Switch

Equalize Timer

AC & DC Surge Protection (MOV's)

AC Input Circuit Breaker

Remote Equalize and Sensing

Output Load Current Sharing

Internal Temperature Compensation

U.L. 1012, U.L. 1481

5-Year Warranty

Digitally Configurable Alarm System

Alarm Thresholds

Alarm Delays

Contact Operations (Latching/Non-latching))

Form "C" Relay Contacts

- ✓ AC Power Failure
- ✓ Low DC Voltage
- ✓ High DC Voltage
- ✓ High DC Voltage Shutdown (HVSD)
- ✓ Summary Alarm
- ✓ Low Current
- ✓ Open DC Protection

Alarm Contacts Testing Capability to Confirm Functionality
(via Front Panel or Remotely with Optional Communication Card)

Indicators

- ✓ AC "ON"
- ✓ Float and Equalize
- ✓ Summary Alarm
- ✓ Low DC Current
- ✓ Overload Current Limit
- ✓ End of Discharge
- ✓ Low & High DC Voltage
- ✓ High Voltage Shutdown
- ✓ Open DC Protection

Optional Accessories

550 Digital Controller with LCD Display

551 Digital Controller with VFD Display

11W 15 Foot External Temperature Probe

09A UL 1481 Label (Fire Alarm) Available for 24V and 48V 60Hz
Single Phase Models up to 100Amps Only

09C I.D. Tags (Black / White / Black)

09V I.D. Tags (White / Black / White)

09U Seismic Bracing

012 DC BKR 1P (Three Phase Units Only)

Communication Protocols

Specifications

ELECTRICAL

• AC Voltage

Voltage range: $\pm 10\%$ from nominal
Frequency range: 60 Hz or 50 Hz $\pm 5\%$
Single Phase models:
120VAC, 208VAC, 220VAC, and 240VAC
Three Phase models:
208VAC, 240VAC, 380VAC, and 480VAC

• DC Output

DC Amps: 15 to 400 Amps
DC Volts: 24V and 48V
Output Filtering: 30m Vrms

• Efficiency

Up to 90%

• Power Factor

Up to 0.95

• DC Voltage Regulation Steady-State

$\pm 0.5\%$ of the setting from no load to full load over the specified input voltage, frequency and ambient temperature ranges.

• Dynamic Response (On Battery)

Voltage transient $< \pm 5\%$ over a step change in the load from 20% to 100%.
Recovery Time $< 200\text{ms}$

• Audible Noise

Less than 65dBA at any point 5 feet from any vertical surface of the charger / power supply.

• Voice Band Noise Filtering

Less than 22dB when tested according to REA Form 524. All A36D units are filtered to 32 dB_{rn} "C" with or without batteries connected.

• Load Sharing

Identical La Marche A36D units, when connected in parallel, are capable of sharing the DC load within $\pm 5\%$ for individual unit outputs greater than 5% of the rated output.

• Temperature Compensation

5 step curve with an average slope of $-0.001\text{V}/\text{cell}/\text{C}^\circ$.
Consult factory for other compensation rates.

• Remote Equalize

When Remote Equalize feature is enabled, switching one A36D charger into Equalize mode would switch all other parallel A36D chargers, in the system, into Equalize mode.

ENCLOSURES

Pretreated with a seven stage iron phosphate wash, sealer and deionized rinse. Then coated with an environmentally safe and durable ANSI 61 gray Polyester TGIC Minite powder finish.

PROTECTION

• Current Limit

Electronic Current Limit circuit with an adjustable range from 90% to 115%.
A36D has an inherent magnetic current limiting feature to protect against short circuits.

• Current Walk In

Output current will gradually increase after the charger is turned on eliminating surges and overshoot.

• AC Breaker

A two pole breaker, on single phase units opens both legs of the AC service to 208 and 240. Breaker opens phase side of 120 VAC service. A three pole breaker is supplied on three phase units.

• DC Breaker / DC Fuse

A single pole output breaker is supplied as standard on single phase units. A DC Fuse is standard on three phase units.

• Alarm Relay Contact

Form "C" Alarm Contacts for:

- AC Power Failure
- High Voltage Shutdown
- High DC Voltage
- Low DC Voltage
- Low Current
- Summary Alarm

REMOTE MONITORING

- Form "C" Alarm Contacts
- With optional Communications Card:
 - Connect to SCADA System
 - Web Monitoring
 - Alarm / Notification E-mails

ENVIRONMENTAL

- Operating Temperature
0 to 50°C
- Storage Temperature
-40 to 85°C
- Humidity
0 to 95% Relative Humidity
(Non-Condensing)
- Cooling
Convection cooled

MEAN TIME BETWEEN FAILURE

The mean time between failure (MTBF) as tested per the Bell Communications Standard TR-TSY-000332 is 225,000 hours at 50°C.

Front Panel Display

LCD Display (Option 550)

VFD Display (Option 551)

Alarm Indicators:

- AC "ON" LED
- Summary Alarm
- Low DC Current
- Overload Current Limit
- End of Discharge
- Low DC Voltage
- High DC Voltage
- High Voltage Shutdown
- Open DC Protection

- 1) AC Current Draws based @ 100% load and standard battery cells of 12L (24V) and 24L (48V). Maximum Current Draw is 115% of ratings shown.
- 2) Must specify only one battery type and number of cells from range shown above. Please consult factory for other available cell ranges if desired range not shown.
- 3) 50Hz units are not UL listed.
- 4) BTU's are based on 12L (24V) and 24L (48V). Heat loss is stated for nominal float voltage, 100% output current and nominal AC line.

Output Voltage Chart

DC Voltage	24V	48V
Number of Cells	12L or 12LR	24L or 24LR
Float	25.4 to 27.6	50.9 to 55.2
Equalize	27.1 to 28.8	54.2 to 57.6

NOTE: Consult Factory for Ni-Cad size availability
